Subject: Collision in the Houston Ship Channel [Air Monitoring Location Map]
Attachments: CTEH Air Monitoring Results Map.pdf

Here is a quick representation of the air monitoring locations and detections (VOCs/Background is 0) **from yesterday**. The data was confirmed by CTEH (RP Contractor) and START. The strike team is also conducting air monitoring but EPA/START has worked with CTEH on multiple occasions so data sharing is common practice.

Detection Locations; 1) Fred Hartman Bridge (9 ppm)
2) Entrance of Baytown Waterfront District (10 ppm)
3) North end of Bay Ridge Road (17.5 ppm)
4) Port of Houston Fire Department (20 ppm)

No detections have been recorded today since approximately 1200 hrs.
